

the aqueous phase is present in at least 75% by weight with respect to the total weight of the composition;

the wax is present in at least 3% by weight with respect to the total weight of the composition;

B<sup>1</sup> *cancel*  
the solid composition exhibits a compressive strength of greater than or equal to 50 grams, at room temperature, after penetration by a cylindrical probe having a diameter of 0.8 cm into the composition over a thickness of 5 mm at a rate of 1 mm/s;

the oily phase/silicone emulsifier ratio by weight is equal to or greater than 5; and

the composition comprises at least 70% water with respect to the total weight of the composition.

B<sup>2</sup>  
15. (Amended) The composition according to Claim 1, wherein the oily phase/silicone emulsifier ratio by weight is equal to or greater than 8.

*Requires further consideration*

Please add the following new claims.

B<sup>3</sup>  
--25. (New) The composition according to Claim 1, wherein the wax is present in at least 5% by weight with respect to the total weight of the composition.--

26. (New) The composition according to Claim 1, wherein the wax is present in 5% to 8% by weight with respect to the total weight of the composition.--

Please cancel claim 22.
